

Keyword Index

A		bioactive pigments	265
4-dichlorophenoxyacetic acid	602	biodiesel	531
acteoside	293	bioethanol fermentation	47
actinobacteria	673	biolubricant	64
activated bentonite	64	bio-organic fertilizer	347
ADI method	241	blue swimming crab	496
ADI preconditioning	785	<i>Bos taurus</i>	707
adiponectin	287	breast cancer	143
adsorbent	506, 602	brown cattle	707
adsorption isotherm	602	Burgers equation	758
agarase	403	C	
agarose	403	cancer therapy	665
aging	457	Caputo fractional differential equation	117
AgTiO ₂ nanoparticles	340	carbonic anhydrase	287
<i>Albizia lucidior</i>	682	Cartesian decomposition	382
aluminum dihydrogen tripolyphosphate	187	catch per unit effort	496
AMPK	727	catenin signaling	293
amyloid beta	449	Cauchy-Schwarz inequality	651
<i>Angelica sinensis</i>	751	Cd ²⁺ toxicity	410
<i>Antheraea pernyi</i>	162	CDO tranche pricing	388
anthocyanins	457	cephalexin	690
antibiotic combination	690	charged water mist	629
anti- <i>H. pylori</i>	549	Chinese hamster ovary cells	410
anti-inflammation/inflammatory	277, 549, 594	chitosan	1
	682	chitosan beads	330
antimicrobial activity/susceptibility	673	chlorophyll	469
anti-obesity	162	cholesterol accumulation	162
antioxidant	549, 682, 698	coastal eutrophication	86
anti-oxidation	277, 733	coenzyme Q10	457
anti- <i>Staphylococcal</i> activity	682	colchicine	30
apoptosis	556, 665	combinatorial approaches	265
apparent amylose content <i>Arachis</i>	434	complementary epistasis	418
<i>hypogaea</i>	178	consistency analysis	758
arbuscular mycorrhizal fungi	202	correlation analysis	211
AroG	40, 170	cosine functional equation	251
<i>Aspergillus flavus</i>	178	COVID-19	211
auto-combustion method	585	crab gillnet	496
B		<i>Crocodylus porosus</i>	449
bacoside content	30	cryptophyte	469
Banach space	126	Cu ²⁺ toxicity	410
barycentric	758	cyanidin-3-O-glucoside	698
basalt	741	cyanobacteria	131
<i>Bcopa monnieri</i>	30	cytotoxic	549
		D	

DAHP synthase	40,170	fly ash	357,478
Day-Nhue River basin	86	fractional part	640
DBD plasma	441	FTIR microspectroscopy	556
derivative-free projection method	514	fuel oil-contaminated soil	96
detoxification	321,733	functional equation	251,520
diabetes	287	functional markers	153
diabetic nephropathy	293		
dienone	594	G	
differential polynomials	645	G0/G1 cell cycle arrest	11
diffusion model	241	gel consistency	434
digestion and absorption	733	generation mean analysis	418
Diophantine equation	106	genetic relationship	312
dipole mode index	618	genome analysis	271
discretely normed abelian group	766	genome mining	265
divisibility	106	genome walking	403
DNA repaired related functions	19	geochemistry	609
double Newton	785	germination	303,441
drought impact	178	ginkgolic acid	11
dry sieving method	228	glucose uptake	727
dust removal efficiency	629	glycyrrhizic acid	410
		grain weight and yield	153,452
E		grease trap	330
early senescence	542	green synthesis	64
ecologic analysis	211	groundwater	366,486
ecotone	78	Guizhou HE	434
edible coating	1	Gulf of Thailand	496
eigenvalues	773		
ELISA	287	H	
enhanced power graph	657	hair repair	195
environmental fitness trade-off	393	halophile	131
<i>Eucommia ulmoides</i> Oliv.	19	HDTMA	602
exosomes	57	heat conduction equation	758
extreme condition	618	heat index	618
		heavy metal pollution	374
F		heavy metals	366,486
factorization	106	hepatocellular carcinoma	11,578
fatty acid methyl esters	707	high quality rice	153
fatty liver	578	high-fat-diet	162
Fe ₂ (SO ₄)	372	Hippo signaling pathway	665
feedback inhibition	40,170	Hopf-Cole transformation	758
ferrous oxidizing denitrifying bacteria	366,486	H-rectangular tensor	257
		hybrid rice	418
fertility restoration	418	hydroponic cultures	717
Fibonacci number	106	Hyers-Ulam stability	126
finite group	657	hypopharyngeal cancer	57
fixed point theorem	117		
fixed-point iteration	785	I	
flavonoid	441,682	image segmentation	241
flooded condition	202		
floor function	640		

insulin resistance	287	molecular docking analysis	727
integral boundary condition	117		
integral inequality	651	N	
interleukin-28B	578	Na ⁺ accumulation	717
intersection power graph	657	nanoparticles	1
ion channel inhibition	321	nanoscale zero valent iron	393
ionic gelation	1	neoagarbiose	403
<i>Ipomoea species</i>	321	Nevanlinna theory	520
ISSR	751	Newton's method	785
iteration matrix	773	Nino3.4	618
iterative equation	126	nitric oxide inhibition	594
		nitrogen fertilizer application	542
J		<i>Nocardia</i>	673
Jurkat cells	556	nonlinear monotone equations	235,514
		normed group	766
K		novel catalyst	531
keratin	195	nuclear factor kappa B	277
kinetics	187	nucleotide-binding sites	425,567
<i>Kocuria</i> sp. MU	196	number of spikelets	418
		numerical radius	382
L		O	
land-use types	228	oil removal	330
laryngeal cancer	57	oil-degrading bacteria	96
leaching	72	operator norm	382
lemongrass essential oil	690	ophiolite	741
leucine-rich repeats	425,567	optical absorption property	340
living donor liver transplantation	578	optimal constant factor	651
local limit theorem	111	oxidative stress	410
longevity	457	oxyresveratrol	727
low-density	585		
lower Northern Thailand	47	P	
L-phenylalanine	40, 170	P sorption	220
Lucas number	106	papermaking wastewater	506
		Parkinson's disease	241
M		peanut	357,478
magnetic properties	585	petrology	609
magnetic susceptibility	374	pharmacodynamics	457
malachite	72	phenolic compounds	441, 682, 698
male sterility	153	phenotypic variant	393
malignant tumor	57	phenylbutanoid	594
marine actinobacteria	271	<i>Philosamia cynthia</i>	312
marine bacteria	265	phosphorus availability	202
medicinal chemistry	727	phycoerythrin	469
meromorphic functions	645	phytochemicals	665
meromorphic solution	520	<i>Pichia kudriavzevii</i>	47
mesoporous	585	piericidin A1	271
metal-engineered biochar	220	pigment	469
microbial community	347	pod histology	178
microbial metabolites	271	Poisson approximation	388
<i>Micrococcus luteus</i> WNO	196	Poisson binomial random variable	111
microRNA	193,578	polyploidization	30
microwave absorbers	585	positive definiteness	257
mitochondrial genome	312	potato biomass	347
modified activated carbon	187	power graph	657
modified phoenix tree leaves	506	probiotic potential	19
modified protein fiber	195		
molecular authentication methods	751		

process intensification	531	substrate sludge	374
projection method	235	sugarcane soil	47
proteolytic activity	449	sunflower sprout	441
<i>Pseuderanthemum palatiferum</i>	556	superstability	251
pyriproxyfen	733	surface plasmon resonance	340
		suture	741
Q		T	
quadratic bilinear system	785	Tartary buckwheat	542
		tectonic	741
R		thermo- and ethanol-tolerant yeast	47
rank of graphs	779	toxicity testing	321
reactive oxygen species	131	TPH contaminated soil	96
rectangular tensor	257	transcriptome	19
removal of Ca ²⁺	506	transesterification	531
repetitive exposure	393	transglutaminase	195
resistance gene analogs	425,567	transthyretin	449
RHEB methylation	143	tributyl citrate	187
<i>Rhodomonas salina</i>	469	<i>Trifolium</i>	425,567
<i>Rhyncholaeliocattleya</i>	698	tropical river	86
rice cultivars	303	tumor marker	57,143
root exudates	366,486	two line-hybrid rice	153
ROS	277		
		U	
S		ultramafic rock	741
<i>Shirakiopsis indica</i>	549	umami taste	707
salt priming	131	urban climate	618
sandalwood oil	277	urban water	374
sandy soil	220,357,478	used frying oil	64
Sangyod Muang Phatthalung	202		
SCAR	751	V	
schematic profile diagram	78	vegetation structure	78
seed purity	153	<i>Vetiveria zizanioides</i>	96
seedling characteristics	303	vibration fiber grid	629
selenized yeast	707	V-singular value	257
Seneque/Riverstrahler model	86		
Sichang Island	673	W	
silkworm	733	Waxy gene	434
simulated acid rain	303	wet sieving method	228
soil aggregate stability	228	wetland	78
soil amendment	357,478		
soil microbial activities	357,478	Y	
soil nutrients	347	YAP-TAED proteins	665
soil-based pot	717		
sonochemical method	64	Z	
spectral radius	773	zeolite	602
<i>Staphylococcus pseudintermedius</i>	690	zinc binding motif	449
Stein-Chen's method	388		
S-type granite	609
